Professional Profile

Computer Systems Engineering student (7th semester) seeking a professional internship in software development. Hands-on experience in Frontend and Backend development with Angular, React, Node.js, and MySQL databases, as well as distributed data processing with Apache Kafka and Apache Spark. Experienced working under SCRUM and Waterfall methodologies, using Trello/Jira for agile board management. Looking to join a technology team where I can contribute from day one and continue growing my technical skills.

Technical Skills

Languages	Java, JavaScript, C#, C++, SQL, HTML, CSS
Frameworks & Libraries	Angular, React, Node.js, Express
Databases	MySQL
Tools	Git, GitHub, Docker, Trello, Jira, Visual Studio Code, Visual Studio, Postman, XAMPP
Methodologies	SCRUM, Waterfall
Other Knowledge	Frontend, Backend, REST APIs, database design, responsive design, technical documentation, Client-Server architecture

Featured Projects

Blossom E-commerce Platform

Angular • Node.js • Express • MySQL

February – May 2026

Profesional Project

- Frontend and Backend development for a complete online store.
- Implemented authentication, shopping cart, and inventory management.
- Built and consumed REST APIs for client-server communication.
- Collaborative work using Git and GitHub under SCRUM and Waterfall methodologies.
- Technical documentation and deployment of the application.
- [Live demo](#) / [GitHub repository](#)

Online CV Builder

React • Node.js • Express

May – June 2026

Personal Project

- Developed a platform for building professional resumes.
- Real-time dynamic preview.
- PDF document generation with professional formatting.
- Implemented dark mode.
- [Live demo](#) / [GitHub repository](#)

Distributed Data Processing

Apache Kafka • Apache Spark • Node.js • JavaScript

May – June 2026

Personal Project

- Implemented a distributed architecture to process over 100,000 records.
- Configured producers and consumers using Apache Kafka.
- Parallel data processing using Apache Spark, development and technical documentation of the solution.

“Sexta Armonía” Web Platform

HTML • CSS • JavaScript • MySQL

November – December 2025

Personal Project

- Developed an online coffee shop web platform.
- Team collaboration on frontend and backend using HTML, CSS, JavaScript, and MySQL.
- Implemented and consumed APIs to integrate server-side logic with the user interface.
- [GitHub repository](#)

Education

Computer Systems Engineering
Universidad Autónoma de Aguascalientes
7th semester

2023 – Present
Aguascalientes, México

Certifications & Additional Training

Mendix Rapid Developer Certification 2026
Mendix
Official certification in Low-Code application development with Mendix. Covers enterprise application development, data modeling, business logic, and user interfaces.

“Patrones Hermosos” Camp
Tecnológico de Monterrey
Academic camp in engineering and programming for women, focused on problem-solving, teamwork, and STEM leadership.

Languages

English Intermediate (B2) — Universidad Autónoma de Aguascalientes
